Mansi Vaidya

San Jose, California | (669) 288-3672 | mansimohan.vaidya@outlook.com | linkedin.com/in/mansi-vaidya

SUMMARY

Project Manager with 2+ years of experience coordinating multiple projects from requirements and planning through delivery and operational handoff. Skilled in scope and schedule management, milestone tracking, resource planning, risk mitigation, issue resolution, stakeholder communication, and process improvement.

EXPERIENCE

Mantrakshar Technology Services — Project Coordinator May 2022 – May 2024

- Managed 5+ web development projects from initiation through release, defining requirements, deliverables, work plans, schedules, milestones, dependencies, and acceptance criteria.
- Coordinated engineering, design, QA, and business stakeholders; facilitated sprint planning, progress reviews, task ownership, and follow-up actions using Agile/Scrum practices.
- Monitored scope, schedules, resources, risks, issues, and change requests across concurrent workstreams, maintaining accurate status reporting and delivery visibility.
- Led issue triage and escalated blockers, tradeoffs, and recommended actions to stakeholders to support timely decisions and keep project commitments on track.
- Improved workflows supporting 10,000+ student records by implementing automation, validation rules, and documentation controls, strengthening data quality, traceability, and operational efficiency.
- Prepared project documentation, stakeholder updates, and handoff materials to align teams, support adoption, and enable consistent post-release execution.

Cognizant — Test Engineer Intern Jan 2022 – May 2022

- Executed test plans, tracked defects, documented results, and collaborated with developers to resolve issues, verify requirements, and improve release quality.

SELECTED PROJECTS

Drone-Based Last-Mile Delivery System — Project Planning & Controls

- Developed the project management plan for a 12-week, $590K+ logistics initiative supporting a 10-drone delivery network, including scope, WBS, Gantt schedule, critical path, budget, and resource allocation.
- Created risk, compliance, quality, communication, and stakeholder plans; defined workflows and KPI dashboards targeting 95% delivery and test-flight success.

Road Paving Operations Optimization — City of San José

- Evaluated city-wide schedules, cross-district dependencies, resource constraints, and lead times of 16–30+ days to identify bottlenecks and recommend scheduling and crew-allocation improvements.
- Built Kanban dashboards, geospatial heatmaps, and resource-utilization models to improve portfolio visibility, work prioritization, and data-driven operational decisions.
- Integrated an AI-powered analytics chatbot that enabled stakeholders to query operational data and obtain automated insights, improving access to decision-support information.

Data-Driven Error Detection in Additive Manufacturing — Project Analytics

- Analyzed 991K+ synchronized records across 180+ print jobs and developed performance indicators to identify process instability, failure patterns, and data-quality concerns.
- Applied logistic regression, SPC I-charts, and generalization testing to evaluate risk drivers, communicate analytical limitations, and recommend future data and process improvements.

EDUCATION

San Jose State University — M.S., Engineering Management Expected Dec 2026

Relevant coursework: Project Management, Operations Planning, Lean Six Sigma, Product Development

Pune University — B.E., Electronics & Telecommunication May 2022

Relevant coursework: Data Structures, Object-Oriented Programming, Artificial Intelligence

SKILLS

Project Management: Project Planning, Scope Management, Schedule Management, WBS, Gantt Charts, Critical Path, Milestone Tracking, Resource Planning, Budget Planning, Risk & Issue Management, Change Management

Delivery & Stakeholders: Agile/Scrum, Requirements Gathering, Status Reporting, Stakeholder Management, Cross-functional Coordination, Quality Assurance, Release Readiness, Process Improvement

Data & Reporting: Advanced Excel, Python, SQL, Tableau, Power BI, KPI Dashboards, Statistical Analysis, Root-Cause Analysis

Tools: Jira, Trello, Minitab **Strengths:** Communication, Organization, Ownership, Problem Solving, Adaptability

CERTIFICATIONS

Six Sigma Green Belt | Google Advanced Data Analytics Professional Certificate
